DEFINITIONS

Assessment Unit (HUC): 10-digit HUC number, HUCs have not been assigned to marine waters

Waterbody ID: Segment numbers within an assessment unit (these are the same numbers used by the Waterbody System in previous 305b reports)

Segment name/description

Segment size: in miles for rivers and streams, in acres for lakes and marine waters

Segment class: the assigned classification from M.R.S.A. Title 38 Section 467, 468, 469. Assessment is made according to the standards of the assigned class.

Monitored date: the last year in which data was collected within an assessment unit or segment. When data is older than five years it is listed as an evaluated segment.

Impaired use: uses from M.R.S.A. Title 38 Section 465, 465-A, 465-B that are found to not be fully supported

Causes: Criteria that have not been attained or known pollutants that cause impairment. Final determination of all causes may require completion of the TMDL or other problem analysis.

Sources: A list of probable sources of an impairment. Final determination of sources may require completion of the TMDL or other problem analysis.

TMDL schedule: Projected date for completion of a TMDL. Schedules listing 2004 indicate an expectation that the TMDL will be completed within this listing cycle. Schedules of 2008 and 2012 indicate an expectation before which those TMDLs may be completed (or other management actions taken to bring a segment into attainment). These schedules may be revised in future listings.
